Team Tovari BV

'A family business for three generations in tableware presentation.'

On the road with Tovari in the 80's.

Arnhem in the 60's.

One of our first shops in Arnhem in the 60's.

Warehouse in Arnhem in 1976.

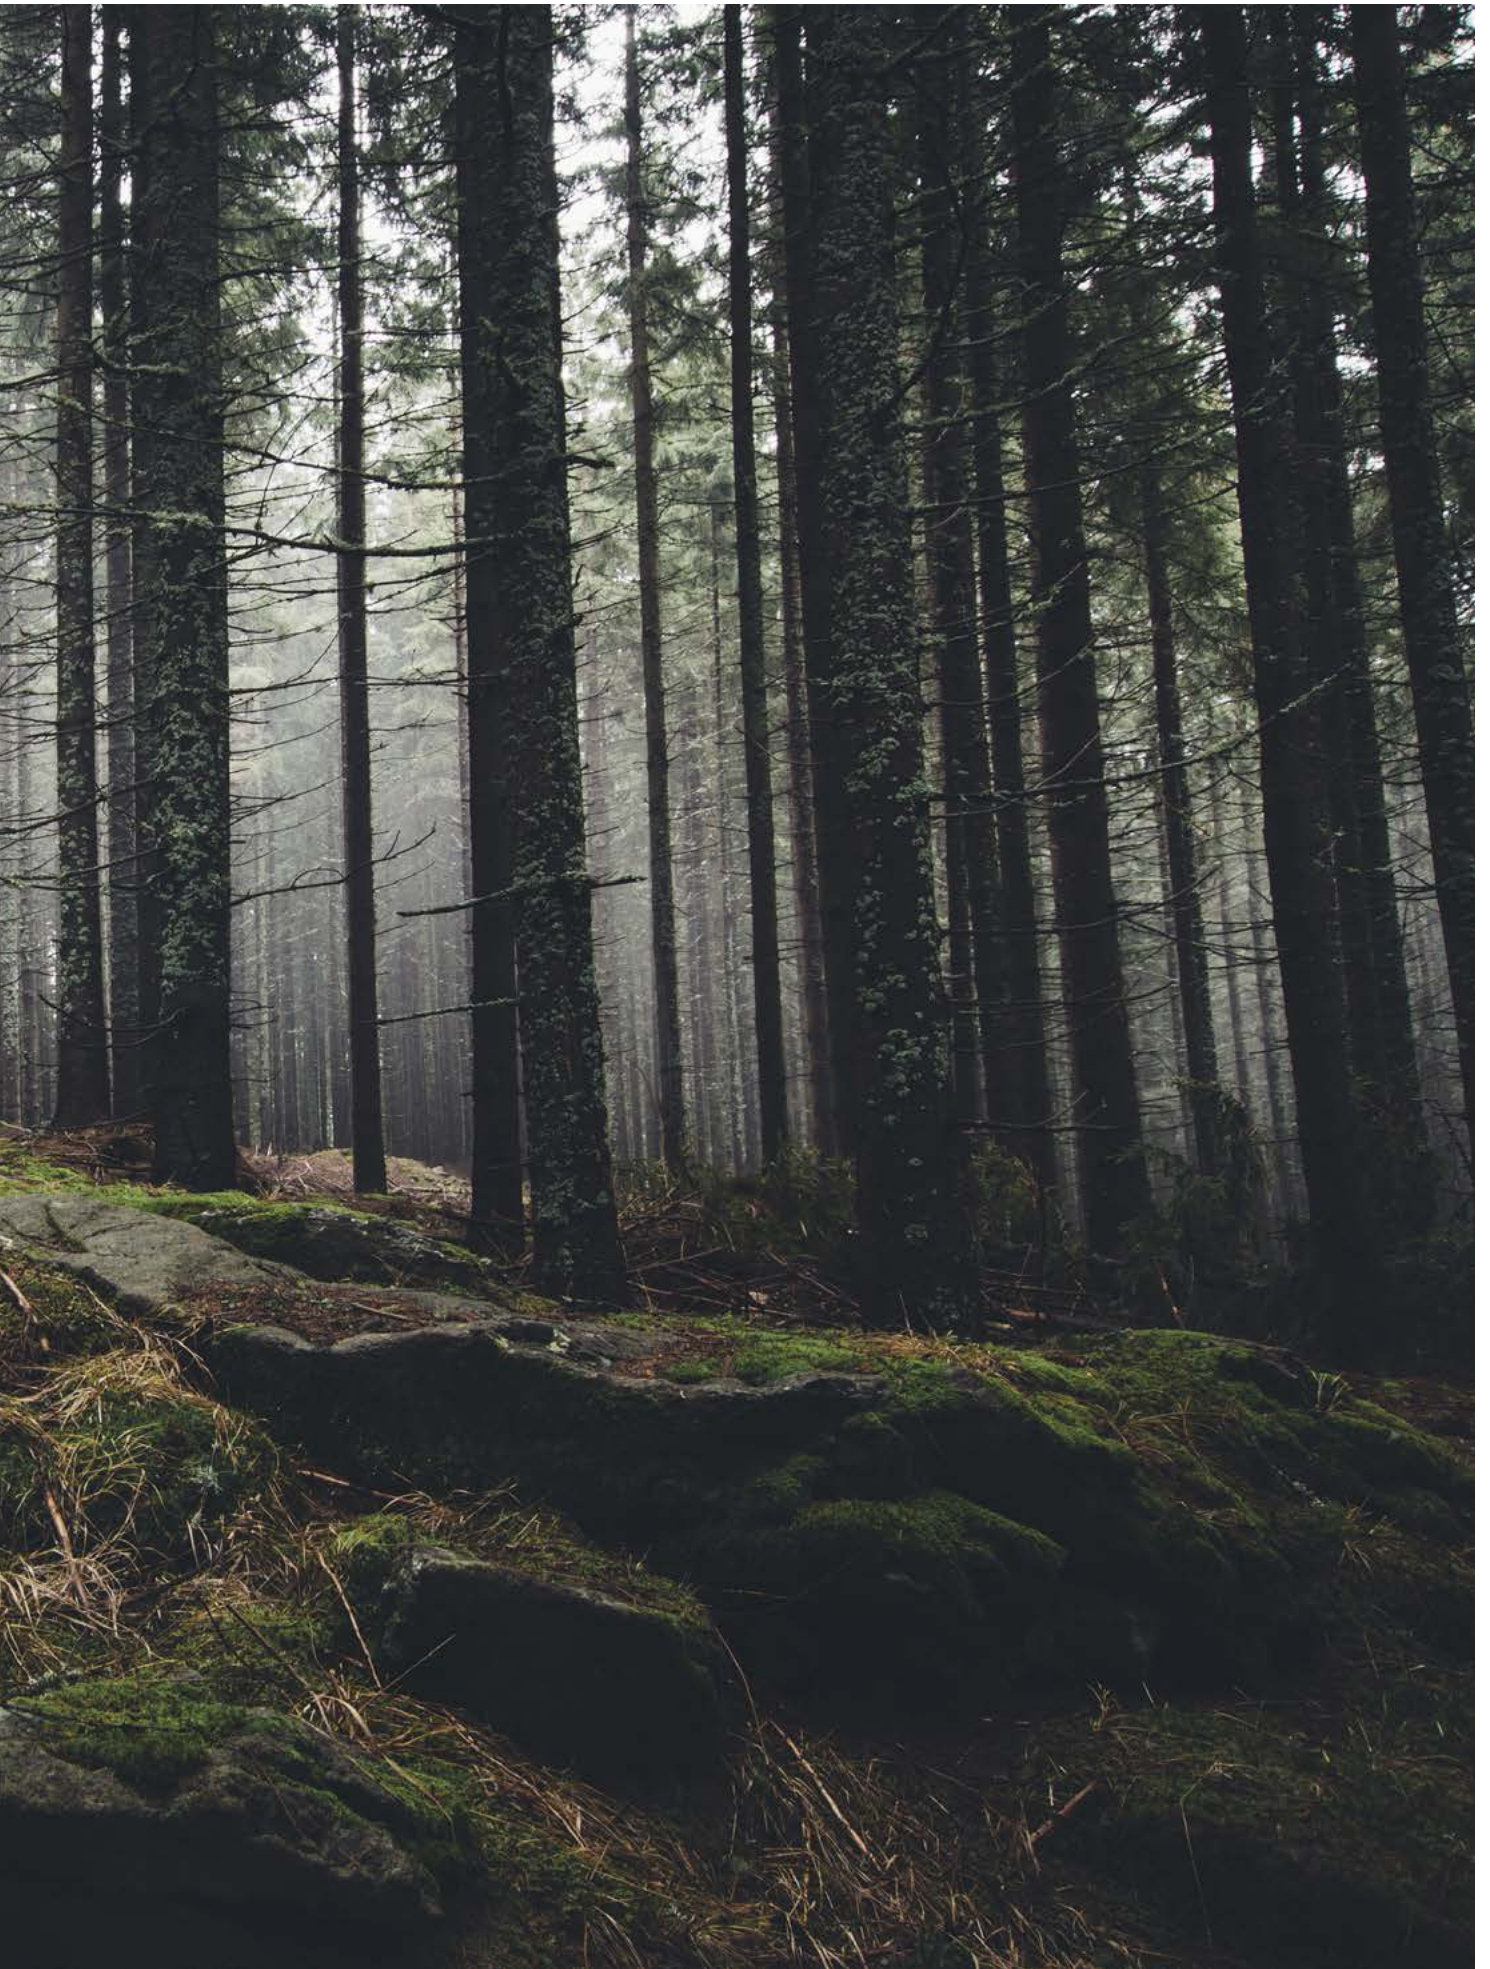

Sustainable? Of course!

We live in a world with limited resources. By selecting suppliers who care for the environment, we can reduce our carbon footprint. This way we can reduce our impact by choosing products that are functional, timeless, and, foremost, durable.

The circular economy is based on the principles of reducing waste and pollution, keeping products and materials in use, and regenerating natural systems. The idea of the circular economy is to create no waste. There should be no end of life of anything.

Naturally, we pursue these principles by carefully considering every step of the process and taking end-to-end responsibility for our products.

Asteria

Asteria is an object lesson in minimalism. A pristine white surface allows Chef's creativity to shine seamlessly and the rimless profile maximises the plating area, allowing the elements of the dish to breathe. The deep black band constrains the presentation and draws attention to the plated food, adding focus and highlight.

Craft stack plates

Steelite is proud to introduce four new shapes to the iconic craft collection, bringing a stacking element that adds an exciting dimension to the table. Craft is inspired by hand-crafted, simple country wares made by generations of potters over hundreds of years. The range embodies the beauty of rich, lustrous glazes applied by hand, and celebrates chance effects and reactions which occur naturally in the kiln. The gem-like glazes married to simple forms and shapes produce a unique and individual appearance, giving Craft a rustic "joie de vivre".

Aurora

An artisan approach is used in decorating each piece of Aurora by hand. This accentuates the individuality and craftsmanship required in its creation and gives each piece its personality. Two reactive glazes are used on each item, either to create contrast, or to achieve a more sophisticated tonal look.

Terrace

The Terrace range brings together the look and feel of Stoneware with the timeless appeal of a simple, tactile embossment. The range utilises semi-matt glazes which pool and interact with the embossed surface to give the impression of hand-worked, semi-precious stone. The embossment is carefully arranged to draw the eye to the centre of each piece, where the focus is on the food, framing it perfectly.

OFF GRID STUDIO - porcelain

NEW COLLECTION

Smoke

Timber

Fire

Fire from Off Grid Studio is designed by potter Sam Gordon to blend the look of hand-crafted pottery with modern durability. Inspired by the raw beauty of woodfired ceramics, Fire captures the essence of this traditional process, where wood is the sole fuel and the kiln requires constant attention to reach and maintain high temperatures. As the wood burns, its natural minerals vaporize and interact with the clay, creating organic, brush-like glaze effects that only nature can achieve. Offered in three semi-matte glazes, Smoke, Timber, and Ember, each piece is intentionally reactive, showcasing unique highlights, subtle color shifts, and one-of-a-kind edge details. Available in nine shapes across coupe and presentation-style profiles, Fire pairs timeless craftsmanship with functional elegance for today's tabletop.

"Wood fired ceramics is, in my opinion, the truest form of pottery;
the clay is dug from the earth, touched by hands and transformed by fired wood." ~ Sam Gordon

Structo Turquoise

Strong structures and stackable shapes form a solid base for Structo. The straightforward robust design found its inspiration in the building and architecture industry. All products are made from durable porcelain based on a gray clay formula, which results in beautiful soft shades of brown. Every item is mass colored and finished with a reactive glaze, making each piece slightly different, with a unique color and speckle pattern.

'Instruction
of use and
maintenance'

CUTLERY & PLATES

Take good care of your cutlery & plates

Wash PVD items carefully before their first use. Do not leave dirty items in prolonged contact with food residues, and do not soak them together in washing water. Certain substances in food can be harmful to PVD and may affect the surface finish. It is therefore essential to clean all items immediately after use.

For handwashing: use warm water and a good neutral detergent. Rinse thoroughly with lukewarm water and dry all items carefully to prevent limescale stains. Do not use pumice, steel wool, abrasive sponges or cloths containing scouring agents.

For dishwasher use: select a program with a temperature no higher than 60°C. Place knives separately from other cutlery (forks and spoons) and from other

stainless-steel kitchenware. Do not use detergents containing chlorine, more than 10% phosphates, oxygen-based bleaching agents or similar products. Remove the cutlery after the cycle and dry it thoroughly with a soft cloth, even if the dishwasher includes an automatic drying phase. This prevents limescale marks on the surface. Do not leave cutlery in the humid environment of the dishwasher; dry it and store it in a dry place. A cutlery-polishing machine with corncob granulate may be used. Do not use ceramic polishing media or any abrasive liquids. Do not use an osmosis dishwasher.

In case of slight colour shading or persistent limescale spots, clean with a soft cloth and vinegar.

Glass & Inspiration Bar & Wine Collection

Rona is our partner for hotel, restaurant and catering. The Rona 5 star brand has brilliant glassware especially produced for the hospitality industry. Rona has a strong export position, qualified personnel and the most modern technologies. The glassworks in Lednicke Rovne is one of the world leaders in the processing of lead-free beverage glass known as crystalline.

The glassworks was founded in 1892 by the entrepreneur Jozef Schreiber as the last and the largest glassworks of the Vienna based company Schreiber und Neffen, which had the most modern technical equipment for its time. The glassworks in Lednicke Rovne is the most successful Slovak glassworks in history.

Laser treated rims

Resistance to chipping increased by 50% against standard rim finishing. Higher resistance against impact, less breakage.

Brilliance and clarity

The high quality of crystalline guarantees permanent brilliance and clarity. Neutral shade of the glass mirrors the original colour of the beverage. Timeless clear transparency is guaranteed by using the highest quality purifiers such as erbium.

Dishwasher safe

Guaranteed permanent brilliance and clear after 1.000 washing cycles according to EU standard EN 12875. Long term tests provided resistance to common detergents. Suitable for washing in commonly used plastic racks. Flat footplates do not retain water after dishwashing. Thermo-shock resistance for temperature difference of 65°C.

Functional and elegant forms

Professional design meets the highest criteria of the international hospitality industry. Elegant and functional designs offer the right glass for every occasion and purpose. Glassware designed to fit most widely used dishwashing racks.

Progressive production technology - pulled stem

Upgraded resistance during dishwashing and manual drying. Seamless stem makes the contact with glass pleasing. Joint-less transition from cup to stem provides extreme resistance to breakage. The glass is resilient, although remains flexible. Extremely hard surface proven according to the Vickers' method.

Crystal Glass - polish cut

>> **ON STOCK**

Cumberland

RONA is a rare example of a glassworks where the machine made production is accompanied by the handmade section. This fact gives RONA a unique opportunity to complete the professional glass assortment with hollowware not only produced by machine, but also with the more resistant handmade decanters and pitchers coming from its own production.
